

EleMasonry Design Software

Versatile.
Accurate.
Transparent.

EleMasonry is a NEW, innovative design software that provides needed tools to the engineers and designers NCMA members work with—take advantage of these opportunities to help your customers today.

Education

- Recorded webinars are available to demonstrate the power of the software.
- NCMA staff are available for webinars and seminars to highlight the key features and benefits of the software.

Custom Units

Have a unique unit configuration, maybe for integral insulation? Want to promote your units with certain features—large format, unique webs, company-branded configurations? EleMasonry design software has the ability for NCMA member producers to create their own custom unit files so these units can be designed using the software. It is a great opportunity to get YOUR units in the hands of designers.

Contact Gabriela Mariscal at gmariscal@ncma.org for more information.

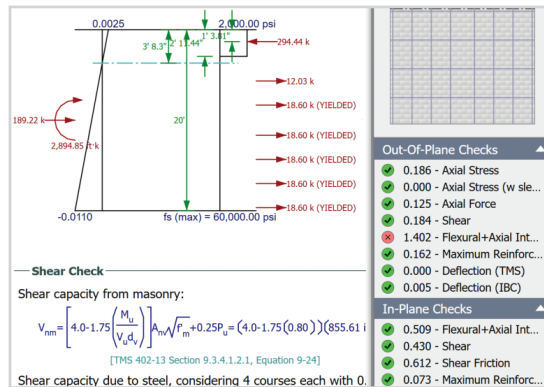

Some conditions apply. Must be an NCMA member. Purchase of copies of software required.
