

Engineers—Get Direct Design Software FREE in 2021!

Let SCMA provide you with a FREE 1-year license to the software. Education is also available.

With Direct Design Software v3.1, a complete masonry building can be designed in a matter of minutes. Building designs are compliant with most recent building codes (2015 International Building Code), and the software has been recently updated to interface with AutoDesk Revit.

Capabilities include:

- Design up to 60 ft tall buildings
- ANY code-permitted specified compressive strength of masonry
- Use CMU from 6-inch to 14-inch width
- ANY mortar type permitted by code
- Steel reinforcement from No. 4 to No. 9
- Both flexible or rigid floor or roof systems
- Set design targets and the software will optimize the design

New for v3.1—Import models from Revit and export structural schedules back. This new feature can simplify modeling and speed up workflows!

 Revit-to-Direct Design Import Environment

SCMA will provide a FREE 1-year license to Direct Design Software to help you and your firm get comfortable using the software.

- The license will be good for 1 year from activation to the individual that it is assigned.
- SCMA in conjunction with NCMA will provide a 1-hour tutorial session explaining Direct Design Software.
- Up to 10 free licenses to your firm sponsored by SCMA.

Find more information about the Direct Design Software at www.directdesignsoftware.com.

**Design
this building
in minutes!**

Upon request, SCMA will provide your firm with an education session so you can hit the ground running with this powerful software. This session will teach you how to utilize Direct Design Software, and also provides your firm with 1 professional development hour (PDH).
